PROFILE

I build durable software across backend systems, data pipelines, AI products, and modern web applications. My work is grounded in practical problem-solving, careful engineering, and continuous learning.

EXPERIENCE

Software Engineer Fellow at Headstarter AI

Jul 2024 - Dec 2024

New York (Remote)

Built scalable applications using cutting-edge AI technologies and modern backend platforms. Collaborated in agile teams on innovative projects leveraging popular frontend frameworks, serverless architectures, and AI integrations.

- Architected and deployed full-stack applications with AI-powered features
- Worked cross-functionally using contemporary frameworks and libraries
- Featured in an NPC interview discussing practical solutions to real-world challenges

Writer at Stalwrites

Jan 2024 - Present

Bacolod City

Create engaging written content focused on anime, manhwa, and documentary topics for a growing YouTube audience.

- Produced high-quality scripts and articles for anime and manhwa content
- Contributed documentary-style writing enhancing channel diversity
- Built a loyal audience through consistent, well-researched content

EDUCATION

Bachelor of Science in Computer Science at University of Saint La Salle - Bacolod

2022 - Present

Bacolod City, Philippines · Currently Enrolled

Senior High School - STEM Track at Sagay National High School Senior High School

2020 - 2022

Sagay City, Philippines · Graduated

SKILLS

Languages

TypeScript / JavaScript / Python / Go / Java

Frontend
